ABSTRACT

The information in this report is directed to both the general information needs of educational researchers and the more specialized needs of personnel administering programs under P.L. 81-874--School Assistance in Federally Affected Areas--and P.L. 89-10--the Elementary and Secondary Education Act of 1965. For this reason, this publication contains two types of current operating expenditure data for public elementary and secondary education at the local level: (1) total current expenditures and (2) current expenditures as defined by P.L. 81-874 and P.L. 89-10. Data are presented in tables by State. The appendix contains a sample of the State fiscal report form for fiscal year 1972. (Author/DN)

HIGHLIGHTS

The number of pupils in average daily attendance (ADA) increased only one-tenth of 1 percent, from 42.4 million in 1970–71 to 42.5 million in 1971–72.

Total current expenditures at the local level amounted to $40.9 billion; the average per pupil expenditure was $963.

A total of $3.7 billion, or 9.1 percent of total current expenditures, came from Federal sources, amounting to $87 per pupil.

Current expenditures as defined by P.L. 81-874 and P.L. 89-10 ranged from a low of $533 per pupil in Mississippi to $1,596 in Alaska. The national average was $926 per pupil, up 7.7 percent from 1970–71.

The low State average per-pupil expenditure, $533, was 4 percent higher than the national average in 1965–66.

The ratio of the highest to the lowest State per-pupil expenditure, approximately 3 to 1, has remained relatively constant over the years.

FOREWORD

There has been increasing interest expressed by the educational community in expenditure data for public elementary and secondary education. In response to this interest, the U.S. Office of Education (USOE) in 1968 began publishing expenditure data compiled from annual reports submitted by the States on total current expenditures and on expenditures as defined by P.L. 81-874, School Assistance in Federally Affected Areas, and P.L. 89-10, the Elementary and Secondary Education Act of 1965. This publication was compiled from these State reports, which have also been incorporated into USOE's Elementary–Secondary General Information System (ELSEGIS) series. More detailed expenditure data, along with revenue, staffing, and other data, will be published in *Statistics of State School Systems*, 1971–72.

The report form used by the States for the annual submission of expenditure data (OE Form 2350-6) was developed with the assistance of State education agency fiscal and statistical personnel, whose essential contribution is acknowledged and appreciated.

Roy C. Nehrt, Chief
Elementary and Secondary Surveys Branch

Basic Tables

1. Current expenditures at the local level for free public elementary and secondary education, by major function and by State or other area: Aggregate United States, 1971–1972 9

2. Current expenditures at the local level per pupil in average daily attendance for regular programs in free public elementary and secondary education, by major function and by State or other area: Aggregate United States, 1971–72 10

3. Percent distribution of current expenditures at the local level for regular programs in free public elementary and secondary education, by major function and by State or other area: Aggregate United States, 1971–72 11

4. Current expenditures at the local level for free public elementary and secondary education, by revenue source and by State or other area: Aggregate United States, 1971–72 12

5. Public elementary and secondary school average daily attendance and expenditures at the local level, reported for administration of P.L. 81-874 and P.L. 89-10, by State or other area: Aggregate United States, 1971–72 13

INTRODUCTION

The information in this report is directed to both the general information needs of educational researchers and the more specialized needs of personnel administering programs under P.L. 81-874, School Assistance in Federally Affected Areas, and P.L. 89-10, The Elementary and Secondary Education Act of 1965. For this reason, this publication contains two types of current operating expenditure data for public elementary and secondary education at the local level:

1) *Total current expenditures.* These data are presented according to the major functional categories agreed upon in the late 1940's. The categories were published in USOE Handbook I, *The Common Core of State Educational Information,* 1953. Total current expenditure data are collected and published biannually in *Statistics of State School Systems.*

The data in this report are not fully comparable to those in other reports of current expenditures since they do not include expenditures for State- or intermediate-level administration. The data reported here do, however, represent 97.6 percent of the estimated $41.9 billion in current expenditures for public elementary and secondary schools.[1]

2) *Current expenditures as defined by P.L. 81-874 and P.L. 89-10:* The current expenditures presented in the second section of this report are those which comply with the definitions of such expenditures in P.L. 81-874 and P.L. 89-10. These include all expenditures at the local level, regardless of funding source, for current operation of public elementary and secondary schools through grade 12, including net expenditures for school lunch programs, student activities, and free summer school programs. Excluded are expenditures made from funds received from patrons as tuition and transportation fees and from funds received under Titles I, II, and III of P.L. 89-10.

All data in this report are for the fiscal year ending June 30, 1972.

---

[1] U.S. Department of Health, Education, and Welfare, Office of Education, *Projections of Educational Statistics to 1981–82,* table 36.

TOTAL CURRENT EXPENDITURES

In 1971–72, a total of $40.9 billion was expended at the local level for the operation of public elementary and secondary schools, including expenditures excluded under P.L. 81-874 and P.L. 89-10 (i.e., expenditures from payments by patrons for tuition and transportation fees, and from funds received under Titles I, II, and III of the Elementary and Secondary Education Act of 1965). Of this total, $39.8 billion was expended for local administration, instruction, attendance and health services, pupil transportation, plant operation and maintenance, and fixed charges. The remaining $1.1 billion was spent for "other school services" (student activities, free summer school, and school lunch programs) (table 1).

A comparison of the percentages by category of total expenditures for 1971–72 and 1964–65 reveals only minor changes in emphasis. In 1971–72, a slightly

smaller percentage was spent for instruction, attendance and health services, pupil transportation, and maintenance and operation of plant; while relatively more was expended for administration and fixed charges (table A). The increase observed for administration could be due in part to a revised definition of this category (i.e., expenses of the principal's office, formerly included in instruction, are now classified under administration by some States). Since the amount expended for employee retirement is included in fixed charges, the increase in this category could be a reflection of the increased costs for social security and other retirement programs.

In spite of increasing overall costs, the amount expended for "other school services" showed a slight decrease. Although all but 2 States had increases in school lunch expenditures, 31 States showed decreases for the total of these combined services. This indicates a cutback in the spending of tax dollars for some special activities.

The variations in spending patterns among the States are shown in tables 2 and 3. Table 2 reports current expenditures per pupil for 1971–72, distributed by functional category, for the 50 States, the District of Columbia, and the outlying areas. Table 3 presents a percentage distribution of expenditures by category.

Revenues for Current Expenditures From Federal Sources

Federal funds in support of total current expenditures totaled $3.7 billion, or 9.1 percent of the total current expenditures from all sources of funds (table 4). The Federal share varied greatly among the States, from a low of 4.4 percent for Wisconsin to a high of 33.0 percent for the District of Columbia.

Table A.–Expenditures at the local level for current operation of the regular day school program, by functional category: 1964–65 and 1971–72

Functional category	1964–65		1971–72	
	Dollars, in billions	Percent	Dollars, in billions	Percent
Total	$17.9	100.0	$39.8	100.0
Local administration	.6	3.3	1.4	3.6
Instruction	12.8	71.4	28.1	70.7
Attendance and health services	.2	1.1	.4	1.0
Pupil transportation	.7	4.0	1.5	3.8
Operation and maintenance of plant	2.2	12.0	4.3	10.8
Fixed charges (includes employer share of retirement)	1.5	8.2	4.0	10.1

Note.–Detail may not add to totals because of rounding.

CURRENT EXPENDITURES AS DEFINED BY P.L. 81-874 AND P.L. 89-10

During 1971–72, expenditures as defined by P.L. 81-874 and P.L. 89-10 rose to $39.3 billion, an increase of $2.9 billion (7.8 percent) over those in 1970–71. The number of pupils in average daily attendance rose only slightly to 42.5 million (up 0.1 percent). Therefore, the average per-pupil expenditure rose from $860 to $926, a 7.7 percent increase (table 5).

Table B is a frequency distribution of State average per-pupil expenditures at $100 intervals. It clearly shows the two extreme highs (Alaska and New York), as well as the large grouping in the range of $700 to $1,100 per pupil. It is noteworthy that the 40th through the 60th centiles lay within the $800-to-$900 range.

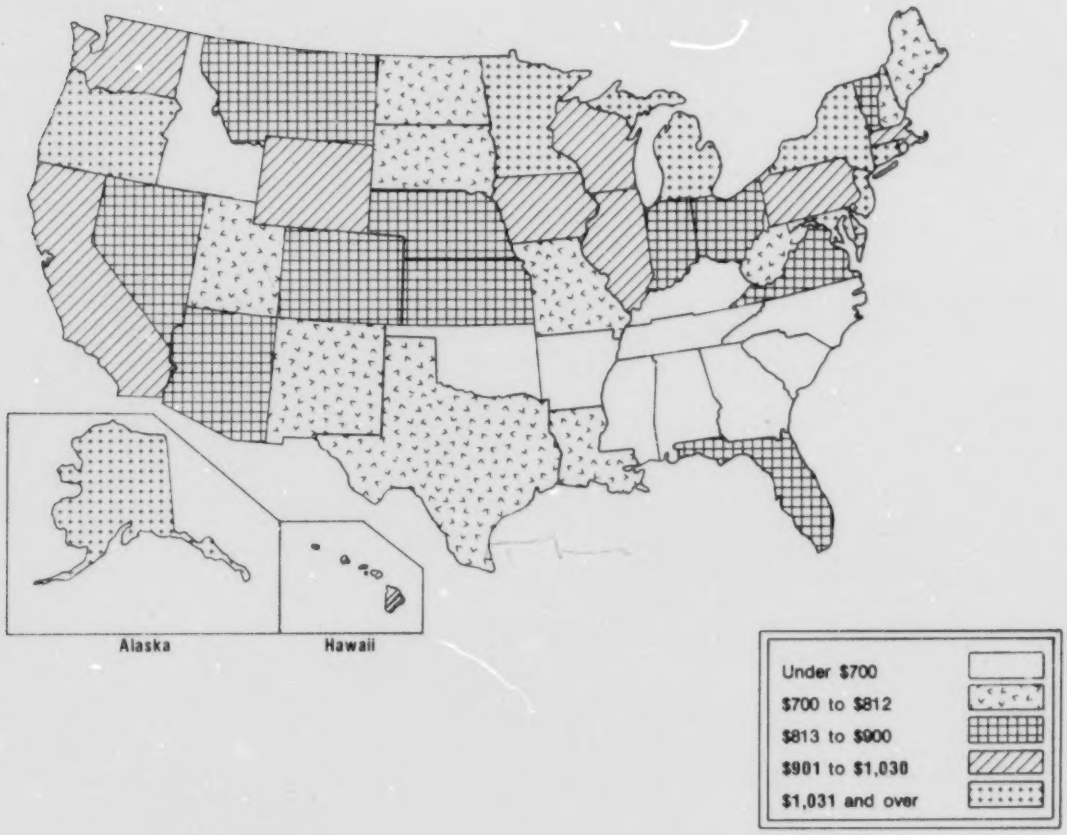
Table B.–Frequency distribution of statewide expenditures per pupil in average daily attendance: 1971–72

Current expenditures per pupil in ADA	Frequency	Cumulative frequency	Measures of central tendency and deviation	
Under $500	0	0		
$500 to $599	4	4		
$600 to $699	6	10	20th centile	$ 685
$700 to $799	8	18	1st quartile	731
$800 to $899	12	30	40th centile Median 60th centile	812 850 898
$900 to $999	5	35	Mean	926
$1,000 to $1,099	11	46	3rd quartile 80th centile	1,023 1,031
$1,100 to $1,199	2	48		
$1,200 to $1,299	1	49		
$1,300 to $1,399	0	49		
$1,400 to $1,499	0	49		
$1,500 to $1,599	2	51		
$1,600 and over	0	51		

Chart 1 presents a graphic picture of the geographic distribution of current expenditures per pupil by State (reported in table 5). It should be noted that the States with the highest expenditure rates are generally in the Northeast, Upper Midwest, and Far West, while the States with the lowest expenditure rates tend to be grouped in the Southeast.

Chart 1.—State average current expenditures per pupil for operation of public elementary and secondary schools: 1971-72

(As reported for administration of P.L. 81-874 and P.L. 89-10)



The data in table C and chart 2 show that the U.S. average per-pupil expenditure increased 94.5 percent in the 7 years since the enactment of P.L. 89-10 in 1965. As the U.S. average has risen, the range of expenditures among the States has widened. In 1964–65, the State average per-pupil expenditure rates varied by $527, from $260 to $787. In 1971–72, this range was $1,063, from $533 to $1,596. The lowest State per-pupil expenditure in 1972 exceeded the 1965 national average, yet the lowest State average was still only about one-third of the amount being spent in the State with the highest per-pupil expenditure. This reflects the fact that the lowest and highest State averages have undergone similar percentage increases in this 7-year period.

Table C.—U.S. average and low and high State averages of current expenditures per pupil in average daily attendance, reported for administration of P.L. 81-874 and P.L. 89-10: 1964–65 to 1971–72.

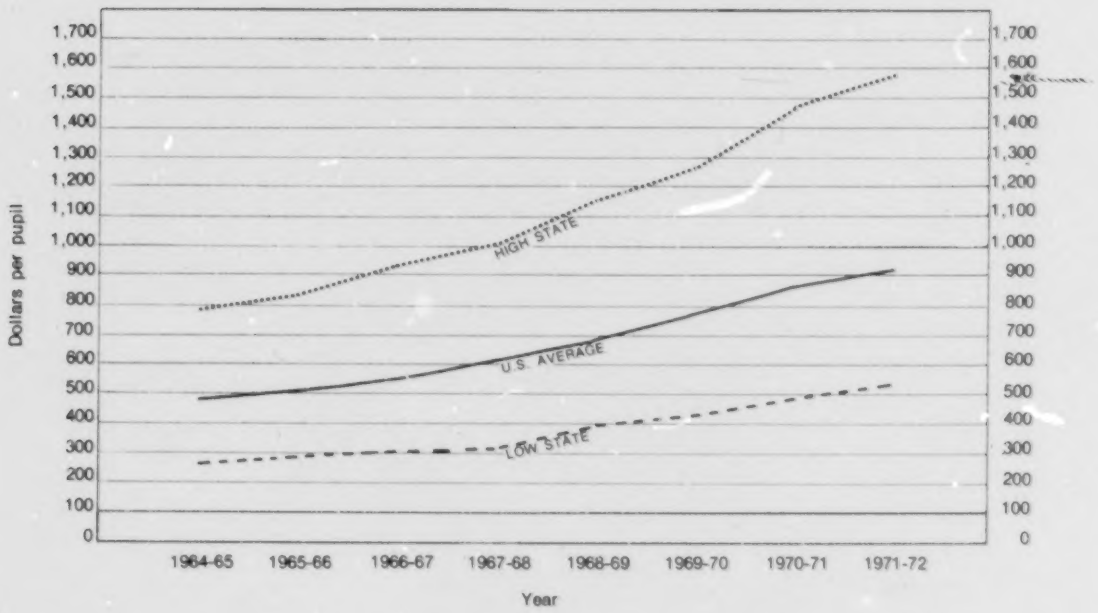
Fiscal year ending June 30	U.S. average	Low State average	High State average
1965	$476	$260	$ 787
1966	511	270	833
1967	555	302	936
1968	612	313	1,013
1969	685	396	1,154
1970	767	431	1,265
1971	860	470	1,487
1972	926	533	1,596

The data shown in table D were adjusted to constant (1971–72) dollars based on changes in the Consumer Price Index (CPI) published by the Bureau of Labor Statistics, U.S. Department of Labor. Even when so adjusted, the national average per-pupil expenditure showed a 47.7 percent increase from 1965 to 1972. The lowest State per-pupil expenditure increased 55.8 percent, while the highest State expenditure increased 54.1 percent.

Table D.—Adjusted U.S. average and low and high State averages of current expenditures per pupil in average daily attendance, reported for administration of P.L. 81-874 and P.L. 89-10, in constant (1971–72) dollars: 1964–65 to 1971–72.

Fiscal year ending June 30	U.S. average	Low State average	High State average
1965	$627	$342	$1,036
1966	658	348	1,073
1967	694	378	1,170
1968	740	379	1,225
1969	790	457	1,332
1970	836	470	1,378
1971	891	487	1,541
1972	926	533	1,596

Chart 2.—U.S. average and low and high State averages of current expenditures per pupil in average daily attendance: 1964-65 to 1971-72
(As reported for administration of P.L. 81-874 and P.L. 89-10)



The gap between the lowest State per-pupil expenditure and the national average closed slightly, but the gap between the highest State per-pupil expenditure and the national average widened by almost the same proportion. Thus, the relative difference between the lowest and highest State expenditure rates remained almost constant during this period.

Changes in the CPI are an important consideration in interpreting increasing educational costs. For example, while per-pupil expenditures expressed in absolute dollars increased 94 5 percent during the 7-year period, the adjusted dollar increase was only 47.7 percent.

APPENDIX

OE Form 2350-6

State Fiscal Report for Fiscal Year 1972

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
OFFICE OF EDUCATION
WASHINGTON, D.C. 20202

ELEMENTARY-SECONDARY GENERAL INFORMATION SYSTEM (ELSEGIS V)

PART A-2c. STATE FISCAL REPORT SUMMARY - FOR FISCAL YEAR 1972

O.M.B. NO. 51-R0938
APPROVAL EXPIRES: 10/31/74

DUE DATE
March 15, 1973

DATE PREPARED

STATE (or territory)

NOTE: Report all amounts to the nearest dollar for the school year 1972. Before completing this form, read instructions carefully. **Section I of this report summarizes expenditures reported in Part A-2b. Data reported on this part are used to compute ESEA, Title I and other Federal program allotments. This report is due, therefore, in advance of Part A-2b.**

SUBMIT COMPLETED FORM TO:
U.S. Office of Education
National Center for Educational Statistics
Elementary-Secondary Surveys Branch
400 Maryland Avenue, SW
Washington, D.C. 20202

D. EXPENDITURES FOR CURRENT PURPOSES FROM FEDERAL FUNDS OTHER THAN ESEA, TITLES I, II, AND III *(items A15, A16, and A17, Section I)* INCLUDED IN SECTION I, LINE A19	$	$	$

CERTIFICATION. I HEREBY CERTIFY that, to the best of my knowledge and belief, the above data in Sections II and III constitute a full and true report of expenditures for and average daily attendance of students in free public elementary and secondary schools in _____ during the 1971-72 school year as defined for purposes of Public Law 89-10.
NAME OF STATE

TYPE OR PRINT NAME AND TITLE OF AUTHORIZED OFFICIAL	SIGNATURE OF AUTHORIZED OFFICIAL

SPECIAL DEFINITIONS FOR SECTION I

Local Education Agency, means a board of education or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent, or other school district located within a State. Such term includes any State agency which directly operates and maintains facilities for providing free public education *(within a county, township or other political subdivision of a State)*.

Free Public Education, means education which is provided at public expense, under public supervision and direction, without tuition charge, and which is provided as elementary or secondary school education in the applicable State, **excluding any education provided beyond grade 12.**

Current Expenditures *(Section I, Line A19)*, means expenditures for free public education, including expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities, but not including expenditures for community services, capital outlay, and debt service, or any expenditures made from funds granted under Titles I, II, or III of the Elementary and Secondary Education Act of 1965 *(Public Law 89-10)*.

Average Daily Attendance. Should be reported in accordance with State law, except that the ADA for education beyond grade 12 and for adult education should be excluded; also, exclude the ADA of pupils for whom tuition payments are received from patrons. Where summer school expenditures are included, Average Daily Attendance *(in full time equivalence)* of pupils involved must be included.

SECTION I – CURRENT EXPENDITURES

(Do not include funds for State or intermediate administration)

Column (a). Report only expenditures by local educational agencies. Where the intermediate or State agency functions as a local educational agency, their expenditures for free public elementary and secondary education are to be included in this column.

Column (b). Report direct State and/or intermediate agency expenditures for operation of free public elementary and secondary schools at the local level, where such expenditures are not recorded in the regular accounts of the local educational agency; e.g., State contributions to employee retirement and textbooks furnished by the State, and therefore have not been reported in Column (a). Do not include expenditures for State institutional schools.

Lines 1 through 9. Only the expenditures for operation of schools through grade 12 should be included. Exclude Outgoing Transfer Accounts, 1400 Series, except for the transfer of funds and pupils to local educational agencies in other States; in such cases, both the money AMOUNT transferred and the ADA should be included for the State of residence and excluded from the ADA and expenditures for the RECEIVING State.

Line 10. Report only **net cash expenditures** made by the local education agencies **from Federal, State, and local tax sources** to cover the deficit for food services *(including the special milk program, school lunch and related child feeding programs, but excluding the value of commodities received from the Federal government and income from sales)*. Net expenditures can be obtained by two methods, (1) subtracting income from sales of lunches from gross cash expenditures OR (2) reporting all tax dollars from Federal, State or local sources.

Line 11. Report only expenditures from public **school funds** to cover deficits for student-body activities *(such as interscholastic athletics, entertainments, etc.)* which are not part of the regular instructional program, **exclude expenditures of receipts from the sale of tickets, student activity fees, etc.**

Line 12. Include current expenditures for summer schools only when provided under public supervision and direction at public expense *(without tuition charge)*. If these expenditures are already included in lines 1 through 9, do not enter a dollar figure here; instead, insert note "included in lines 1 through 9." If you cannot furnish ADA for summer school, do not report expenditures for summer school.

Line 14. Report tuition and transportation fees received from patrons which are a reimbursement for items of expenditure reported in lines 1 through 9.

Lines 15 through 17. Report expenditures made from Federal funds granted under Title I for the education of children of low income families *(line 15)*; under Title II for school library resources, textbooks, and other instructional materials *(line 16)*; and under Title III for supplementary educational centers and services *(line 17)*. Report only expenditures that have been included in the expenditures reported in lines 1 through 9. If these moneys do not go through the books of local school systems, please report the amount in parenthesis and explain.

SECTION II – ATTENDANCE AND AVERAGE EXPENDITURE PER PUPIL DATA

Line A. Include average daily attendance for summer school pupils if line A12 in Section I is completed or if summer school expenditures are included on lines 1 through 9. Summer school average daily attendance should be adjusted to full-time equivalence of regular day school attendance.

Line B. Self-explanatory.

Line C. Include here any expenditures that are not reported in section I, lines 1 through 13. Enter expenditures for (a) services provided by the school system for the community, such as recreational activities, civic activities, public libraries operated by the school system, child care centers of the school system, welfare activities of the school system, services to nonpublic school pupils, etc. Include expenditures for summer Head Start programs operated as part of the school system's program, [redacted]

Line D. Pursuant to Part B, Sections 121 through 123 of Public Law 91-230, in order to administer "Special Incentive Grants," it is necessary for the U.S. Office of Education to establish an effort index. To do this, information is needed on the amount of Federal funds *(other than ESEA, Titles I, II, and III)* included in the expenditures reported on line A19, Section I of this report. If actual expenditure data is not available, please report your best estimate of the expenditures that are included.
